

FABRIC AND CARPET CLEANING

EuroSolutions believes to achieve “best” results we must extract, lift and separate to remove all contaminates. Our engineered solutions are built to remove stains, odors, dirt debris from all carpets, fabrics including linens to restore them to the best possible condition. Our approach is achieved by utilizing polymer technologies and degreasing technologies that provide us with a powerful combination of cleaning action.

OptiCLEAN removes tough soiled areas including sand, dirt, and other particles that are challenging for conventional stain removers and pre-treat/pre-spray solutions.

OptiCLEAN HD Heavy Duty Cleaner

Completely new technologies to provide “state of the art” environmentally friendly surfactants allowing material to remove quickly grime, smoke residue, dust, debris leaving a clean and treatable surface for our OSE.

OptiCLEAN FPS Fabric Pre-Spray

Compounded for use on all fine fabrics, rugs, and carpet. We’ve carefully selected the most appropriate chemicals to remove challenging stains such as oil, grease, makeup, and ground-in messes. These chemicals act independently and collectively to prevent re-deposit of sediment.

OptiCLEAN TR Textile Rinse

Provides your customer with an effective mildly acidic and balanced stain remover. Even set-in stains can be removed from fabric due to the interactions between our surfactants and detergents. This extends the life of your fabric due to the lack of abrasive chemicals.

OptiCLEAN HDGP Heavy Duty Carpet Pre-Spray

Environmentally compliant, water based, biodegradable, industrial carpet cleaner, degreaser. HDG is designed for all industrial carpet cleaning applications. This product is designed to attack heavy soils with exceptional degreasing action.

OptiCLEAN LBCF Liquid Browning Coffee Free

A “fighting” solution developed to deliver a powerful solution for the hardest stains for fabrics, carpets, linens and upholstery. The fluid primary focus is to attack ingrained coffee and discoloration that occurs in all situations.

Based on the product offering and the situation, a combination of the OptiCLEAN series of chemicals will deliver a clean pH mildly acidic texture “after” treat.
