

## SMOKE & ODOR ENCAPSULATION

A large, artistic image of white smoke or steam rising and spreading across the right side of the page, set against a light background.

Fire and smoke damage needs to be addressed from multiple areas. EuroSolutions has elected to approach these areas of concern from two angles. First, we insure the charred area is completely free of particulates and seal it against future release. Secondly, we address airborne odors by “scrubbing” particulates and odors from the air with our engineered solutions.

### **OptiCLEAN OSE** Odor & Soot Encapsulator

Designed to provide a protective coating that seals surfaces and encapsulates particulates. OSE can also be applied within air handling systems (ductwork) to remove odor’s caused by fire and smoke damage. Providing the customer with improved indoor air quality and occupant comfort.

### **OptiCLEAN HD** Heavy Duty Cleaner

Completely new technologies to provide “state of the art” environmentally friendly surfactants allowing material to remove quickly grime, smoke residue, dust, debris leaving a clean and treatable surface for our OSE.

### **OptiCLEAN CS** Citrus Solvent

Our citrus cleaner is suited for your toughest applications as it supports all cleaning, degreasing, and deodorizing actions. Utilizing the natural product D-limonene it captures odors, degreases and enhances the power of all cleaners. It can be used “as-is” for the toughest applications, or as an additive in your pre-sprays at 1oz to 2oz per diluted gallon.

### **OptiCLEAN LFD** Lemon Fresh Deodorizer

LFD is the perfect deodorizer for all commercial and residential applications when looking to mask odors and leave behind a fresh clean scent. It can easily be added to your cleaning solutions or simply diluted with water for wiping down hard surfaces.

### **OptiCLEAN SN** Smoke Odor Neutralizer

SN is the solution to neutralize smoke odors, and counteract the widespread damage that can result from a fire in your home or business. When sprayed or fogged, it encapsulates/neutralizes the malodorous particles. Effectively, knocking them out of the air. SN can also be added to your water-based cleaning solutions for the application to porous or absorbent surfaces like textiles and carpet.

## Eliminate and Encapsulate
