

# INDUSTRIAL, COMMERCIAL & RESIDENTIAL CLEANING

**OptiCLEAN** industrial cleaning line is designed to utilize the best combinations of natural ingredients that will deliver a safe alternative to harsh chemicals for the primary function of cleaning and degreasing industrial and household institutions. Through the design and selection process to maximize your return on investment, we have elected to design and market "concentrates" to our end users. This strategy will allow fluids to be used in a multitude of ratios maximizing effectiveness and reducing overall costs and time

**OptiCLEAN GP**  
General Purpose

**OptiCLEAN MP**  
Multi-Purpose

**OptiCLEAN HD**  
Heavy Duty

**OptiClean GCA**  
Glass Cleaner

Designed for surfaces that need to be cleaned of contaminants and foreign materials. Our solutions can be used with minimal water for difficult applications. The activity and solvency of the selected ingredients allow excellent separation and removal from the surface and with the balance of co-emulsifiers allows for material to be "trapped" within the solution eliminating re-deposit of sediment and dirt rating costs. Not only do they clean they "degrease" tough challenged areas. All technologies are fortified with leading edge engineered solutions.

**Excellent Solvency**

**Environmentally Friendly  
Green Technology**

**Water Dilutable & Rinsable**

**Low VOC, Low Toxicity**

**All OptiCLEAN Solutions carry, *Synergy Cleaning Action* when used in the specific ratio ES recommends for maximum effectiveness and efficiencies.**

1:8 Dilution for Heavy Applications

1:50 Dilution for Milder Requirements

More details can be shared on individual technical data sheets.
